

TRUONG HOANG LUAN

Game Developer

+84902823262 | hoagluan5899@gmail.com | Tan Phu District, Ho Chi Minh City

PROFILE

Passionate and forward-thinking Game Developer with 4+ years of experience engineering immersive games in Unity (C#) and Cocos Creator (TypeScript). Specializing in architecting scalable game frameworks, optimizing rendering for low-end devices, and building robust game mechanics. Adept at leveraging Agentic AI and advanced LLMs (Antigravity, Claude, Copilot) to rapidly prototype and accelerate development pipelines. Proven track record of launching commercially successful titles across hyper-casual, puzzle, and casino-style genres.

EDUCATION

2017-2022

Posts and Telecommunications Institute of Technology HCM Branch (PTIT HCM)

Bachelor of Information Security

SKILLS

Professional Skills

- Builds cross-platform games with **Unity** and **Cocos Creator** in **C#** and **TypeScript**
- Architects scalable systems using **SOLID principles, OOP, and Design Patterns**
- Applies **game math, physics simulation, and URP rendering** knowledge to build performant systems
- Builds **custom Unity Editor tools** and automation scripts to accelerate team workflows
- Optimizes rendering and memory for **low-end mobile devices**
- Integrates live services via **REST APIs, Socket.IO, PlayFab, and WalletConnect**
- Ships titles across **Midcore, Puzzle, Hyper-Casual, Slot/Casino, and GameFi** genres
- Works in **Agile/Scrum** teams with Git, Jira, and Trello
- Actively uses **AI pair-programming and agentic workflows** to ship faster

Soft Skills

- Proven ability to operate independently, owning features from estimation and technical design to final delivery.
- Mentors junior developers through code reviews and 1-on-1s, fostering a culture of continuous learning and knowledge-sharing.
- Active listener who effectively bridges the gap between technical and non-technical teams (designers, artists, PMs)
- Self-driven in tackling complex technical blockers; actively suggests improvements to codebases, pipelines, and workflows.
- Adept at providing accurate estimates, communicating blockers early, and maintaining high quality under deadline pressure.

Languages

- Vietnamese (Native), English (TOEIC: 850 - Professional Working Proficiency)

WORK EXPERIENCE

KOBAN GAMES STUDIO

06/2025-Present

Frontend Game Developer

- Develop high-performance Slot games using Cocos Creator, architecting the original "base" games that serve as the foundation for the studio's reskinning pipeline.
- Design reusable frameworks and custom internal tools to streamline production, allowing the broader team to rapidly reskin and deploy new titles.
- Perform deep memory profiling and rendering optimization to ensure games run flawlessly at high framerates across mobile WebApp environments and low-end devices.
- Mentored team members through code reviews, organized technical sharing sessions, and partnered with leadership to interview and evaluate new engineering candidates.

WEJOY GAMES STUDIO

02/2024-06/2025

Unity Game Developer

- Acted as the core solo developer on multiple Hyper-Casual, Casual, and Hybrid Puzzle games, collaborating seamlessly with Game Designers, UI artists, and Spine animators.
- Entrusted by leadership to architect and implement the studio's most logic-heavy and technically complex game systems.
- Architected reusable game frameworks adopted by the entire development team, while actively mentoring interns and freshers to elevate overall code quality.

ANTADA TECHNOLOGY COMPANY LIMITED

02/2023-02/2024

Unity Game Developer

- Developed new gameplay features and UI systems for a 3D midcore title, integrating live multiplayer functionality via backend APIs and WebSockets.
- Successfully adapted to a company pivot, taking full end-to-end ownership as a solo developer to architect, build, and ship complete puzzle games for external partners.
- Designed reusable codebases and rapid-prototyping systems to independently deliver high-quality titles under strict partner deadlines.

PLAYGROUND COMPANY LIMITED

08/2022-02/2023

Unity Game Developer

- Developed the client-side architecture for Web3/NFT games, integrating WalletConnect for secure user authentication and transactions.
- Integrated real-time features and live server data by connecting the Unity client to backend services using REST APIs and WebSockets.
- Implemented dynamic UI animations and interactive elements using Spine to create highly polished, engaging user experiences.

EBIZWORLD COMPANY LIMITED

11/2021-08/2022

Unity Game Developer

- Served as a core developer for "NeloVox", a custom 3D voxel-based modeling tool built entirely within Unity
- Architected and implemented core 3D tool features, procedural mesh generation, and tool development.
